Please Note: In order to receive the output in the format noted above please make sure that the appropriate information has been included. For fax response please enter in your fax number. For email response please enter in your email address.

Sampling Directions

Using a clean spade, take soil randomly from at least 6-8 spots in each garden or lawn area you want tested. Dig down at least 6" for gardens, 6"-8" for trees and shrubs, and 3" for lawns. Mix all the soil together and let it air dry. Remove stones and other large debris, and place 1/2 to 1 cup of dry soil in a clean plastic bag, labeled with a name and sample number (e.g., Front lawn, Sample #1; Vegetable garden, Sample #2.) Make sure you include the sample name(s) and number(s) on the sample sheet you fill out and mail with your sample.

Sample Summary
