Extra money

If you invest in the **IHS Energy (Canada) Ltd. Registered Retirement Plan** you get extra money because the company will match your contributions. This is an important advantage – who else gives you extra money for your future retirement? By maximizing your contributions, you won't leave money on the table! And more money in your retirement plan means more flexibility to live the retirement lifestyle of your dreams.

Lower management fees

Because of the combined buying power of your company and Sun Life Financial, you pay fees that are lower to what you would pay on your own at a bank or mutual fund company. When you pay lower fees, more of your hard-earned money is invested and growing for you.

Exclusive investment funds only available to group plans

Contributions to your plan can be invested in a variety of investment funds. You decide how your contributions are invested. Some of the funds available to you are unique and only available to group plan members. You won't find these funds if you invest on your own at a bank or mutual fund company.

Professional investment managers

The funds available under your plan are managed by some of Canada's leading investment managers.

You pay no commission fees

When you invest through your plan, you save more money for your retirement.

You save taxes

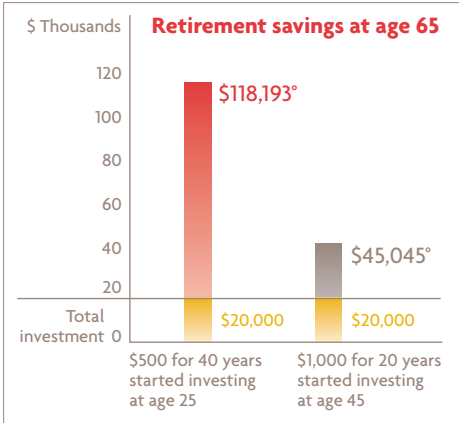

Contributions you make to a registered plan are tax-deferred. And if you're contributing by making regular deductions from your pay, your contributions are invested on a pre-tax basis, giving you an instant tax benefit. The benefit of tax-deferred earnings growth over time is significant.

Easy access to your account

Sun Life Financial offers easy ways to get your account information when you want it. Our Plan Member Services website, Customer Care Centre, Automated Telephone System and account statements are available to help you manage your account.

Time is your greatest asset

As you can see, the sooner you start saving, the more money you'll have at retirement. And the IHS Energy (Canada) Ltd. Registered Retirement Plan is the first place you should start!

* This graph assumes an overall 6% rate of return and that contributions are made at the beginning of the year.

Investment Risk Profiler

This tool will help you determine what kind of investor you are and how much risk you are comfortable with as you save. Answer each of the following questions, keeping your objective in mind.

1. Which statement best describes your comfort level with fluctuations in the value of your investments?

- a) I'd be very upset if my investments dropped in value over any period of time. **(1 point)**
- b) I'm willing to accept a lower, more predictable rate of return as long as fluctuations in the value of my investments are small. **(10 points)**
- c) I'm willing to accept some fluctuations in the value of my investments as I'm seeking a higher rate of return. **(20 points)**
- d) I want the highest rate of return possible, and understand the value of my investments can fluctuate significantly. **(30 points)**

2. How long will you leave this money invested before you'll need a significant portion of it for your stated objective?

- a) Less than 5 years **(1 point)**
- b) 5-10 years **(10 points)**
- c) 11-20 years **(20 points)**
- d) More than 20 years **(30 points)**

3. How likely is it that you'll need access to a large portion of this money earlier than expected? (E.g. taking early retirement)**

- a) Very likely **(1 point)**
- b) Somewhat likely **(10 points)**
- c) Unlikely **(20 points)**
- d) I won't need access to any of the money in this plan early. **(30 points)**

** Early retirement is defined by pension legislation and can vary by province.

4. Which of the following pattern of returns would you be most comfortable with? Assume an initial amount of \$5,000 invested for 10 years.

- a) Your investment grows without losses to \$8,100. However, in one of the years the value of your portfolio does not increase. **(1 point)**
- b) Your investment grows to \$10,100 in year 10, but slightly declines in value in two of the years. **(10 points)**
- c) Your investment grows to \$12,400, but significantly declines in value in three of the years and was worth only \$3,500 after the first year. **(20 points)**

5. With the four results below, how would you invest \$10,000?

- a) A guaranteed return of \$500. **(1 point)**
- b) The potential of earning \$800 but the risk of earning only \$300. **(10 points)**
- c) The potential of earning \$1,200 but the risk of earning nothing. **(20 points)**
- d) The potential of earning \$2,500 but the risk of losing \$1,000. **(30 points)**

6. If your investment dropped in value by 20% in one month, how would you react?

- a) I'd cash in my investment immediately. **(1 point)**
- b) I'd make no changes until the value recovers and then re-evaluate. **(10 points)**
- c) I'd do nothing. I understand my investments will fluctuate from day to day, but believe they will grow over the long term. **(20 points)**
- d) I'd invest more while the prices are low. **(30 points)**

7. How would you describe your investing personality?

- a) I don't like risk and can only tolerate moderate losses. **(1 point)**

8. Which of the following statements best describes your investment knowledge?
